**We have a highly
accessible design system.**

**We have a highly
accessible design system.**

And we watch teams
use it to ship **inaccessible products and
experiences.**

VDS components are available for web and native experiences

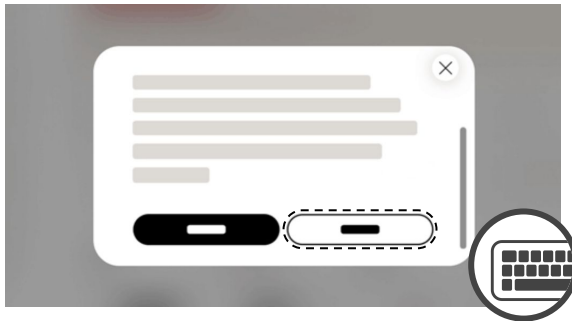

What VDS gives you for free

Years of expertise compressed into every component, token and pattern

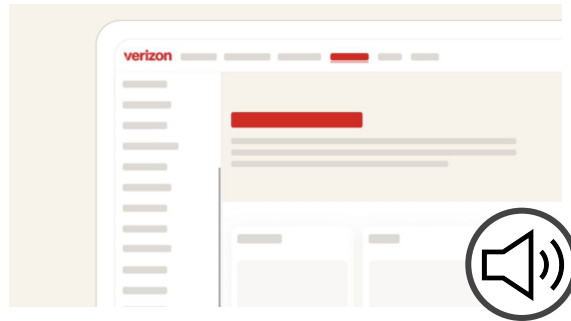

Visual Clarity

Colors and typography designed to be readable by everyone

Mechanical Reliability

Components that are built to be operated by a keyboard just as easily as a mouse

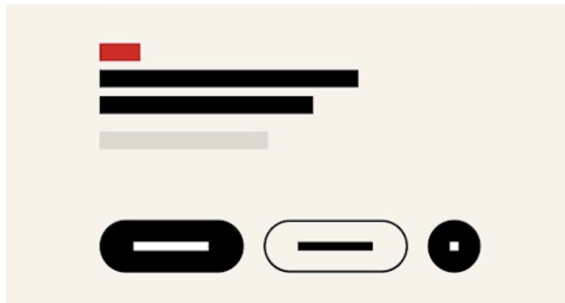

Built-in Translation

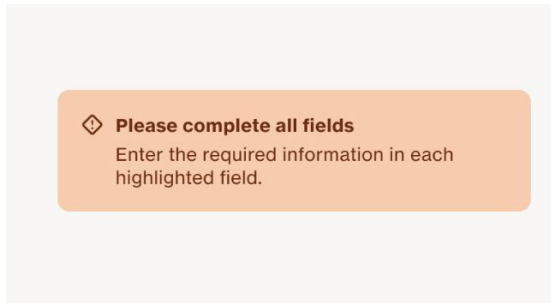

Elements that are pre-wired to communicate their basic function to assistive technologies like screen readers.

What VDS doesn't give you

The design system cannot make contextual decisions for you

It cannot understand
Context

It cannot manage
Feedback

It cannot define
Architecture

**The design system is the
foundation.**

The experience is everything
built on top of it.

Three places **the gap** shows up

1.

Design

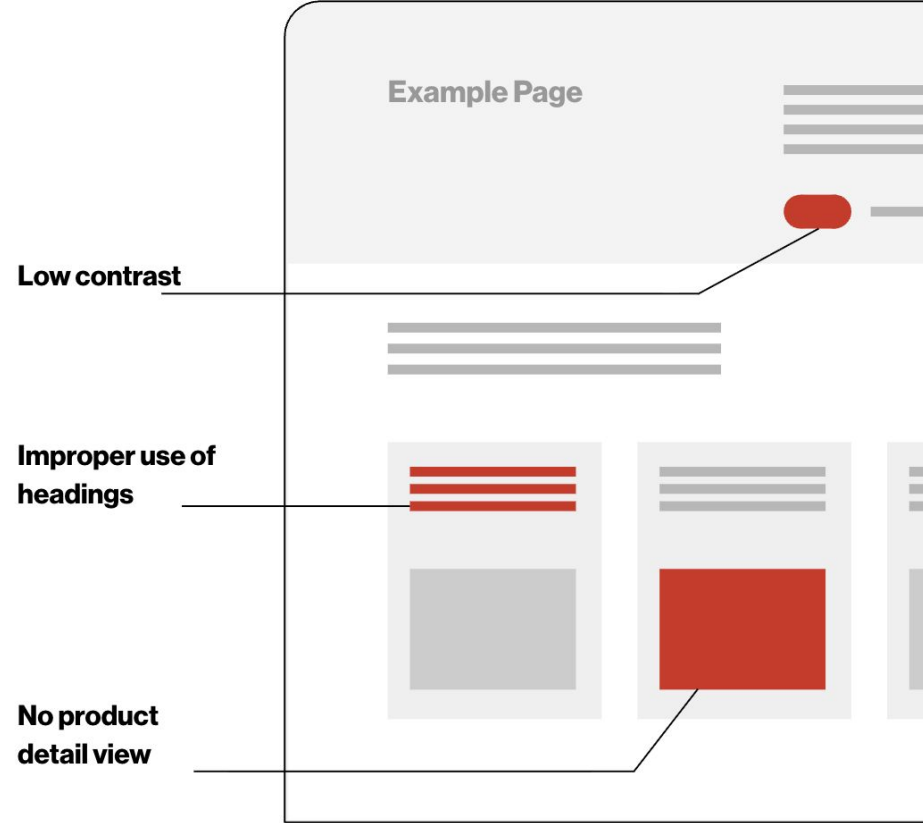

2.

Development

3.

Experience

Design Decisions

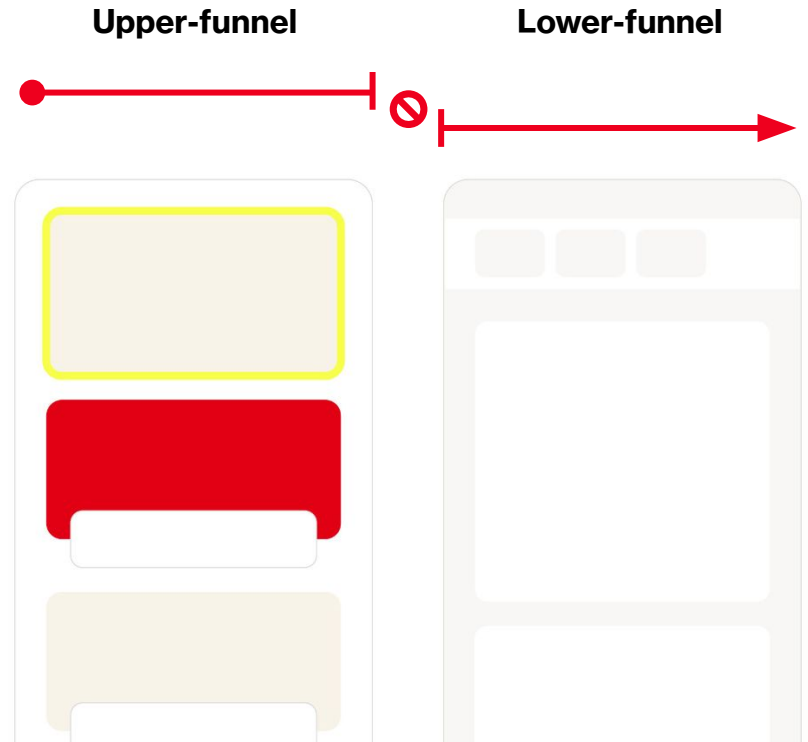

Development Decisions

Experience Decisions

So whose job is it?

All of ours!

**An accessible design system
is the best starting point we can
give a team.**

**An accessible design system
is the best starting point we can
give a team.**

What the team does with it is
still up to them.

One more thing...

**Ask questions and
try it yourself.**
