Goal

Systemization

Description

- Expand the capabilities of existing platforms and systems within the CX Systems portfolio:
 - Verizon Design System
 - Verizon Assistant, Global Navigation & Patterns
 - Content Strategy
- Grow adoption and the utilization of products and systems within the portfolio
- Establish a standard of measurement of capabilities and processes that will allow the team to evaluate what's working and to drive initiatives

Comment Count 0**Manager****Comment**

I am convinced that myPlan could not have been delivered on-time or at an acceptable level of quality without the VDS component work that you and your team executed flawlessly. Amazing job! It's also great to see you build this competency internally rather than us relying on agencies.

Employee**Comment**

We've made many enhancements to the Verizon Design System (VDS) in 2023. VDS has proven to be an invaluable asset for our business and GTS partners, providing the highest quality in reusable experience assets and components with unprecedented speed to market. This was seen best with myPlan where we delivered 50+ components and templates utilized across the various digital sales flows. This year we've updated our comprehensive set of design guidelines, created many more reusable components and shared assets, and created internal processes and frameworks that further drive design efficiency, consistency, and scalability across our digital channels.

Within Content Strategy we have begun to scale our operational impacts through the standardization and templating of our common project deliverables. We have delivered documentation and frameworks around team guidelines and processes laying the foundation for a scalable system that will further extend the reach of our team members. With this system in place, our business partners will have access to a central repository of our content guidelines, templates, and best practices, ensuring consistent messaging and brand voice across our digital channels. We successfully delivered the scaffolding of our alpha version of the Content Design System and presented it within the Design Systems CX Forum

We have expanded our internal VZI engineering coverage to 70% of our Run & Operate responsibilities allowing us to continue to reduce agency dependency.

We have delivered 30% of our Ways of Working documentation in preparation for increased external contribution and future onboarding needs.

Goal

Verizon Design System

Description

- Expand the Design System with a new set of Native components that will serve a new audience as a capability

- Evolve the existing set of components to be more generalized and flexible to enable usability from a broader audience
- Leverage data to identify opportunities, validate our focus areas, and drive awareness and education
- Create standards, processes, and documentation to drive expansion pack creation
- Drive internal efficiencies and cost savings by scaling CX system architecture

You're running the VDS as a true "product" - continuing to evolve and expand it - this is probably a great example to our own product management teams! (I wonder if there is an opportunity there as another "system"?). To build upon this idea now that we're part of the CXO and closer to Lance's "capability" teams - I'm curious how we might share our learnings about product management.

Employee

Comment

- Scalable operations
 - Implemented a Design System Support Coverage framework to ensure equal distribution of support tasks amongst VDS designers and improve support response times
 - Assumed ownership of VDS guideline authoring on Brand Central, sunsetting agency dependency
 - Onboarded and scaled up VDS Engineering team in India enabling full release support, reducing our agency dependency
- Systemization
 - Expand the capabilities of the Verizon Design System through enhancement releases in January, April, June, September, and November - notable capabilities include:
 - Launched Content 3.0 guidelines following the 2022 release of VDS 3.0
 - Launched first iteration of Button Icon, creating the ability to convert any icon in the Brand icon library into an interactive button
 - Launched expanded color palette for use in data visualization in addition to reviving and applying 3.0 updates to the 1.0 data visualization guidelines

- Launched (base) Carousel in Beta, one of the most highly requested features we've had since launching VDS 3.0
 - Promoted collaboration and visibility through a comprehensive communications plan detailing Design System enhancement releases, adoption stories, training materials, and usage guidelines
 - We have delivered Phase 1 of VDS Native components which enable VDS adoption within our app ecosystem. Further phases scheduled through 2024.
- Adoption
 - Delivered component specs to GTS for new platform offerings of the design system, specifically for native iOS and Android application development, that we are currently working with them to co-develop
 - Enabled myPlan by partnering with GTS across 10 epics and 140 user stories, creating and delivering:
 - 54 component spec drawings
 - 2200 component variations
 - 250 responsive page designs
 - 32 React components
 - 23 full page React templates
 - Supported the launch of the 3.0 Digital Sales Flow through adoption coaching
 - We delivered the myPlan expansion component library and also +Play and Project Willow expansion libraries.
- Co-ownership
 - Created standards, processes, and documentation to drive expansion pack creation
 - Provided hand off and guidance for many journey specific myPlan delivered components and templates
- Measurement
 - Partnered with Enterprise Architecture defining Design System requirements which were included in their global code scanning and benchmarking process
 - Delivered Q1 qualitative/quantitative user survey to begin to track usage patterns, need, and sentiment from existing Design System adopters
 - Established our quantitative baseline KPIs for adopter satisfaction as a result of our VDS Bi-Yearly survey and evaluated qualitative open-ended survey feedback for a team readout to identify opportunities and actionable items.
 - Completed 20 adopter interviews (spanning March and April) to dive deeper into opportunity areas for VDS improvement and expansion.
 - Set up access for Brand Central Google Analytics to measure engagement of design guideline content

Goal

Content Strategy

Description

- Simplicity, consistency & brand voice for key VCG journeys

- Continue to optimize Learn to Shop journey
- Improve CX for business internet and wireless e-commerce
- Streamline promo redemption, contract pricing, bulk ordering & port-in experience for MyBiz
- Improve registration, log in and onboarding experience for MyBiz by simplifying the experience.
- Improve messaging and notifications to customers to reduce load on customer agents.

You're scaling this team (and transitioning leadership) while continuing to provide value and expanding its remit. I've been very impressed by Andy, his strategic thinking about how to shape the team and practice are just what we need and I know he appreciates the trust and support you're showing him.

Employee

Comment

- Scalable operations
 - Increased staff via SOWs to reduce coverage gaps
 - Standardized the Content Strategy intake process
 - Standardized common project deliverables and created reusable templates
 - Created collaboration forums and work stream visualizations including cross-journey opportunities that have been promoting content reusability
 - This work has focused primarily within the Bill and Onboarding experiences
- Systemize methodologies and documentation
 - Created and codified documentation to serve as templates to future projects
 - Optimized navigation to content strategy guidance within the Verizon Design System
 - Currently creating a blueprint for the foundation of a content design system that can unlock future efficiency and

- automation opportunities
 - Created a framework and definition of component parts for a Content System MVP which cares for Error Messages, CTAs, Loading Screens, and Prompts.
 - Defined more specific system assets around Profile Taxonomy and Offer Taxonomy.
- Measure, promote, and celebrate the discipline
 - Created onboarding and training documentation for Content Strategy
 - In process of identifying, mapping, and building partnerships with content creators across the Enterprise to drive unity, consistency, and governance within the content creation and delivery process
 - Track success and progress with OMNI and Business Transformation teams
 - Connected with content creators and design leads across VCG, raising awareness of the discipline and when/how to engage with us
 - Grown the team and redefined roles to make sure the team is able to scale effectively

Goal

Verizon Assistant

Description

- Expand the Assistant to more immersive experiences, hardware, and applications
- Establish and enhance the Verizon Assistant Studio as the source of truth for VZA assets and governance
- Socialize and drive engagement with the Verizon Assistant Studio. Expand its use cases to other CX projects
- Develop VZA brand voice in Spanish

- Create a Verizon brand voice for Spanish speakers, extending capabilities for real-time, personalized experiences to an underserved segment

Comment Count 0**Manager****Comment**

As we reduced focus on this work there were some difficult conversations with team members that you handled very well and with a lot of sensitivity and understanding.

Employee**Comment**

We have made the difficult decision this year to cut back on our product management support of the Verizon Assistant within CX. As a result of this decision, Assistant design work will continue to be prioritized and worked through the Conversational team under Caroline Brown and any feature enhancements to the product will be managed within the business.

Architectural improvements, management, and governance remains within my portfolio.

- Completed architectural audit and created a system alignment blueprint
- Enhanced spell check and autocorrect capabilities within the Assistant Studio

Goal

Model the Leadership Principles

Description

Lead yourself, your people and the business by embodying the following Leadership Principles: Act on Customers' Behalf, Create and Drive Change, Deliver Results, Drive Teamwork, Align on Our Direction, Nurture Development, Foster Inclusion, Lead by Example and Take Responsibility as described in more detail in the Leadership Principles behaviors.

As part of people leadership, you are expected to: assess performance, coach and develop, hold employees accountable, take appropriate corrective actions, train, and provide ongoing direction and feedback.

Comment Count 0

Manager

Comment

You're setting a great example to your team and people around you about how to live by our leadership principles. You're driving great results done by awesome teamwork. You're demonstrating radical candor while building strong relationships. I love the way you show up in our staff meetings (curious, candid, engaged). Your trip to India and the way you engaged with the team there was also very much appreciated.

Employee

Comment

I am consistently working to best embody our core leadership principles so that they guide my actions and decision-making. I drive continuous improvement not only for myself but for each of my team members and the systems we create and govern.

Delivering tangible results is a key focus of mine. One project in particular this year, Bayou, we were able to enable tangible results within the business. During Bayou, I set clear goals and expectations for my team that were aligned with the overarching strategic objectives of the project. I provided accountability and support to the team by having regular checkins and pulse checks. I provided space for them to experiment with potential solutions and time boxed activities to ensure we were still able to meet critical timelines. By monitoring deliverables and providing ongoing feedback, we were able to stay on track and deliver our components to the implementation teams on time.

I have elevated team transparency and communication by encouraging and coaching team members to present in various forums throughout the year. Individual team members have presented and participated multiple times within the Design Community Shares, the CX Forums with Richard and Sasha, and also co-presented with me in our partner teams All Hands and staff calls. This has given the team more exposure to our users and stakeholders and helped them to strengthen their own presentation and storytelling skills.

Within my teams, I encourage open communication, trust-building, and shared ownership. I work hard to provide a clear vision and strategic direction for our systems, and work with each team member to understand their role in achieving our goals. I work to ensure every team member feels valued, respected, and heard. I promote diversity and seek diverse perspectives for better decision-making and innovation.

Leading by example is a core principle. I demonstrate the values and behaviors I expect from my team. I act with integrity, transparency, and professionalism. I take responsibility for my actions, I encourage constructive feedback and critique, and keep an open and always learning mindset.
