Summary

In my role as a senior executive, I prioritize innovation and excellence in user experience across all digital platforms. Leading the development and adoption of comprehensive design systems, I focus on enhancing customer connectivity and delivering creative solutions to complex business challenges.

With a robust foundation in web development, usability, and cross-functional collaboration, I have successfully optimized workflows and driven high standards in accessibility and usability. My leadership style is centered on fostering strong executive-level collaboration, enabling organizational-wide alignment on key strategic initiatives. I excel in bringing diverse perspectives together, building consensus, and driving unified action to achieve business goals.

I am committed to cultivating a culture of continuous learning and growth, empowering teams to deliver exceptional customer experiences. My passion lies in driving organizational success through strategic leadership, effective communication, and a customer-centric approach."

Experience

**Verizon** (12 yrs 7 months)

Sr Director
Design Systems
2021 - Present

As Senior Director of Design Systems within the Customer Experience Organization, I lead a global team of product managers, designers, engineers, and content strategists focused on optimizing Verizon's digital experiences. We build content and design systems that allow us to scale the very best from our research, user testing, accessibility, design, and engineering north stars across the Verizon enterprise. I actively collaborate with teams at the executive level and working team level across Verizon to raise awareness and advocate for the effective utilization and integration of our systems.

Sr Manager
Digital Marketing
Business Operations
2016 - 2021

As Senior Manager of Front End Engineering within the Digital Marketing Business Operations team, I had the privilege of leading a global team of 20+ developers focused on delivering best in class customer experiences on Verizon.com, ensuring our web pages met the highest level of accessibility and usability standards. This role allowed me to partner with various teams and business units across Verizon enabling me to constantly learn and grow my capacity as a leader.

Manager, Front End Web Development
2014 - 2016

Consultant, Front End Web Development
2013 - 2014

**Baptist Health** (1yr 10 months)

Web Application Developer
2011 - 2013
